- a. The road to Skoci Brdo Devojka, which forks from the Petrovac-Budva highway, has been repaired for automobile traffic. On the height of Skoci Brdo Devojka is a battery of five long-barreled cannons, which is concealed by a camouflage net, and is manned by a permanent crew. Under the gun emplacement are underground munition depots and shelters. The crew is housed in the former Sveti Nikola monastery. Approximately eighty meters from the battery are a number of concrete platforms for anti-aircraft machine guns. The machine guns, which have not been mounted, are stored in a new underground tunnel which is approximately twenty meters long and is located under the main highway. The tunnel is well guarded.
- b. On the slopes of Platamon, cement fortifications for a battery of five long-barreled cannons are being constructed. The battery is very well camouflaged, and is officially known as the Platamon Heavy Coastal Battery. The cannons are German models. There are also two concrete semi-underground depots containing ammunition for the battery which are concealed by branches and are not discernible from the sea.
- c. Construction work, begun in the summer of 1949, continues in the area of Sveti Nikola, Gabrovac, and Preilja Glava.
